SUMMARY

Senior Full-Stack Engineer with 5 years building production SaaS platforms end-to-end across fintech, analytics, marketplaces, and operations software. Experienced leading architecture, backend systems, and cross-functional delivery for founder-led startups. Strong focus on Next.js, Node.js, PostgreSQL, Stripe, and scalable product infrastructure.

SKILLS

Languages	TypeScript, JavaScript, SQL
Frontend	Next.js (App Router), React, Tailwind CSS, Shadcn UI, Framer Motion, Responsive Design
Backend	Node.js, Express.js, Prisma, REST APIs, Webhooks, Socket.IO, OAuth, JWT Authentication
Databases & Data	PostgreSQL, Supabase (RLS), Redis, MongoDB, Database Design, Schema Design, Migrations
Payments & Integrations	Stripe, Stripe Connect, Paddle, PayPal, Multi-Currency Systems, Samsara API, QuickBooks
Cloud & Infrastructure	AWS (EC2, RDS, S3, Lambda), Cloudflare, Vercel, Docker, GitHub Actions, CI/CD, Sentry
Testing	Jest, Vitest, Playwright

EXPERIENCE

Senior Full-Stack Engineer — Rocket Devs Jul 2025 – Present
Remote (US, EU, MENA)

- Lead engineer on **Indieicator**, a Stripe Connect revenue analytics platform, and **Sat-Raj**, an operations platform for a 30-year-old US fuel wholesaler.
- Designed and shipped the architecture, database schema, backend systems, and deployment infrastructure for both products end-to-end.
- Built a multi-tenant analytics ingestion pipeline combining Stripe/Paddle webhooks, reconciliation jobs, and historical backfills into a Postgres ledger secured with Supabase RLS.
- Replaced a spreadsheet-driven operational workflow at Sat-Raj, reducing daily pricing, invoicing, and customer-email processing from **45–60 minutes to under 90 seconds**.
- Built reconciliation systems integrating Samsara telematics, supplier FTP data, and QuickBooks synchronization through idempotent background jobs.
- Led **2 junior developers** and collaborated directly with founder clients on product scope, architecture, and delivery.

Full-Stack Engineer — Design&Desktop Jan 2025 – Jul 2025
Remote (Germany)

- Redesigned an AI video rendering pipeline, reducing render times from minutes to seconds across browsers and hardware configurations.
- Migrated rendering infrastructure from FFmpeg.wasm to MediaBunny after optimizing multithreaded browser rendering workflows.
- Improved restaurant data scraping throughput by implementing parallelized Chromium automation pipelines.
- Built logistics infrastructure for a German B2B marketplace, including ZIP-code mapping and shipping logic across **~12,000 regional entries**.

Senior Engineer — Apifiny Jul 2023 – Dec 2024
Islamabad, Pakistan

- Shipped **Diffed.gg**, a 3-sided gaming services marketplace, **end-to-end within 2 months** as senior engineer on a 3-person team.
- Built a configurable backend engine enabling admins to onboard new games and ranking systems without engineering involvement.
- Designed a multi-currency wallet and settlement infrastructure using Stripe and PayPal integrations with historical FX-rate handling.
- Implemented real-time order chat, OAuth authentication, fee-split workflows, and screenshot verification systems.
- Led architecture, schema design, admin tooling, and mentorship of **2 junior developers**.

Junior to Mid Engineer — Apifiny Jan 2022 – Jun 2023
Islamabad, Pakistan

- **Promoted from Junior Engineer to Senior Engineer within 18 months** based on technical ownership and delivery impact.
- Built features across multiple B2B SaaS products for agency clients across frontend, backend, and database systems.
- Developed dashboards, APIs, and internal tooling while expanding into full-stack architecture responsibilities.

SELECTED PROJECTS

Indieicator

indieicator.com

Baremetrics-style revenue analytics platform built on Stripe Connect for subscription businesses.

- Designed three parallel ingestion flows: live Stripe/Paddle webhooks, scheduled reconciliation jobs, and historical backfill pipelines feeding a multi-tenant Postgres ledger.
- Built an invoice and event-driven MRR system supporting prorations, subscription plan changes, and long-term analytics retention beyond Stripe's event window.
- Implemented per-day FX conversion across 30 display currencies using ECB exchange-rate data with Redis-cached analytics dashboards.
- Added drill-down reporting enabling direct traceability from aggregated metrics to source customer transactions.

Diffed.gg

diffed.gg

Three-sided gaming services marketplace supporting players, experts, and administrators.

- Built a configurable ranking and game-management engine enabling new games and ranking systems without backend code changes.
- Designed a Stripe and PayPal-powered multi-currency wallet system with historical FX-rate settlement handling.
- Implemented Socket.IO-based order chat, OAuth authentication, fee splitting, screenshot verification, and admin moderation tooling.
- Led system architecture, schema design, backend infrastructure, and developer mentorship.

Sat-Raj

satraj.inc

Operations platform replacing 39 manually managed spreadsheets for a US fuel wholesaler.

- Automated pricing calculations, invoice generation, and customer communication workflows reducing daily processing time to under 90 seconds.
- Built reconciliation pipelines integrating Samsara telematics data with supplier FTP systems through idempotent background jobs.
- Designed structured dispatch and address-validation workflows replacing inconsistent free-text operational processes.
- Integrated on-prem QuickBooks systems through a custom bridge syncing accounting data from platform APIs.
